PROFESSIONAL SUMMARY

AI/ML engineer with hands-on experience building production-ready Generative AI systems, multi-agent pipelines, and RAG architectures. Demonstrated track record across competitive AI hackathons (Google Cloud AI Seekho 2026, Microsoft Agents League 2026) and a global remote AI engineering internship. Proficient in Python, PyTorch, HuggingFace Transformers, LangChain, FastAPI, and Azure AI — with expertise spanning agentic reasoning, retrieval-augmented generation, and full-stack AI deployment.

EXPERIENCE

ML Engineer Intern — PM Accelerator • Remote (HQ: Miami, FL)

Jun 2025 – Aug 2025

Cohort #9 • Global Cross-Functional Team

- Selected for a competitive global AI engineering cohort; developed multi-agent AI systems and LLM pipelines, contributing to cross-functional product builds with an emphasis on production readiness and deployment.

HACKATHONS & COMPETITIONS

Career Research Agent — Microsoft Agents League Hackathon 2026

Jun 2026

- Built an autonomous agentic system (Azure AI Search, Groq LLaMA 3.3 70B, FastAPI/Streamlit) with multi-step reasoning, tool-calling, and semantic retrieval over career datasets; delivered an end-to-end demo and deployment pipeline in a 9-day sprint.

InsightCV — Google Cloud AI Seekho Hackathon 2026

2026

- Built a Gemini API-powered CV analyzer with multi-step prompt chains and structured, multi-dimension scoring feedback over a Flask backend.

PROJECTS

RAG Chatbot

Python • LangChain • FAISS • OpenAI API

- Production-style RAG chatbot with a FAISS vector store, chunking strategies, and embedding pipelines supporting multi-turn, context-aware retrieval over a custom corpus.

Full-Stack Agentic LLM Chatbot

FastAPI • React • FAISS • PyTorch

- Agentic chatbot implementing the full query → retrieval → generation → execution loop, with sandboxed Python code execution.

Speech Emotion Recognition

Python • TensorFlow • CNN-LSTM • Librosa

- CNN-LSTM model classifying 6 emotions from raw audio using MFCC, chroma, and spectral contrast features; full preprocessing-to-evaluation pipeline achieving competitive accuracy on RAVDESS.

EDUCATION

B.E. Electrical Engineering — NUST Islamabad (SEECs)

2023 – 2027 (Expected)

Relevant Coursework: Machine Learning • Signal Processing • Data Structures & Algorithms • Computer Networks • Python • C++ & OOP

TECHNICAL SKILLS

Generative AI & LLMs: LangChain • RAG Pipelines • HuggingFace Transformers • Gemini API • Groq • Azure AI Search • Agentic AI • Multi-Agent Systems • FAISS • Vector Databases • Prompt Engineering • Fine-tuning

ML & Deep Learning: PyTorch • TensorFlow/Keras • Scikit-learn • CNN • LSTM • Transformers • Sequence Modeling • Fairness Evaluation

Backend & APIs: FastAPI • Flask • REST APIs • Git/GitHub • Streamlit

Languages & Tools: Python • C/C++ • JavaScript • SQL • NumPy/Pandas • MATLAB • Azure AI Services
